October 18, 2024

Dear Resident,

This letter is to inform you that the City of Cleveland, Division of Water Pollution Control will undertake a project to provide an added level of protection against flooding in the Brookside Boulevard Road area in the City of Cleveland. The **Brookside Boulevard Area Sewer Project (Phase 2)** is scheduled to commence the week of November 4, 2024. Starting on Brookside Boulevard, the project consists of replacing approximately 300 feet of sewer and installing approximately 650 feet of catch basin relief sewer on Brookside Boulevard north of Courtland Avenue, then installing approximately 640 feet of catch basin relief sewer on Tyler Avenue between Brookside Boulevard and West 130 Street, and finally installing approximately 50 feet of catch basin relief sewer on Courtland Avenue east of Brookside Boulevard.

The City of Cleveland has contracted with Fabrizi Trucking and Paving, Inc. to perform this work. The City of Cleveland will work with the contractor and you to insure minimum inconvenience during the construction period. The contractor will install barricades within the limits of the construction area. The sewer excavation will take approximately 3 months to complete. The pavement will be restored in the trench area and the street will be resurfaced within the limits of work in the spring of 2025. We ask for your cooperation in observing all traffic regulations and following detour signs.

The City of Cleveland will try its best to make this project a quick and safe one. Should you have any questions or concerns, please feel free to contact Project Manager Cecilia Mazzei at (216) 664-3779. Thank you for your cooperation in this important sewer project.

Project updates available at www.clevelandwpc.com, Twitter, Facebook and Instagram (#CLE).

Sincerely,

Ryan Lopez, Interim Commissioner
Division of Water Pollution Control
